How to take notes

Typed or hand writen

    Why not both?

        1. Hand write in class
        2. Type afterward to solidify and reword for clarity

What to do before

    Review last class's material

    Do reading

    Prepare any questions from last class

How to organize

    Set it up like an outline

Main topics

    With topics under that

        And details

            And specifics all indented in to show connection

Star important topics

    And possible test questions

And highlight vocab when you review your notes

    So that you can make notecards later
