Step 1: Navigate to your course

Select "Enrolled Users" under the "Users" sub-category in the "Course administration" menu.

Step 2: Enroll Users

From this screen you will see all of your students which are enrolled. If you would like to enroll another student, select "Enrol users"
**Step 3: Search and add**

This window will appear, where you can define which role you are adding for (Student for most of you) and whom you are adding. You can search for them in the *Search Bar*, and can add them to the course by selecting *Enrol*. You do not have to close out the window and re-open it for each addition, Moodle will add them when you are finished and click *Finish enrolling users*. 
Step 4: Finish

After clicking Finish enrolling users, you should see your list propagate with your selections.
